

October 2, 1998

Mr. M. Reddemann  
Site Vice President  
Point Beach Nuclear Plant  
6610 Nuclear Road  
Two Rivers, WI 54241

SUBJECT: NRC RADIATION PROTECTION INSPECTION REPORTS 50-266/98018(DRS);  
50-301/98018(DRS)

Dear Mr. Reddemann:

On September 4, 1998, the NRC completed an inspection of the radiation protection program at your Point Beach Nuclear Plant. The results of this inspection were discussed on that date with Mr. Mende and other members of your staff. The enclosed report presents the results of that inspection.

The purpose of the inspection was to review portions of the radiation protection program, including the portable instrument control and calibration programs, the whole body counter operation program, and the contamination survey and monitoring program. In addition, several open items regarding the instrument calibration program, and control of high radiation and locked high radiation areas were reviewed and closed.

Based on the results of this inspection, no violations of NRC requirements were identified. Overall, the whole body counter, and the contamination survey and monitoring programs were well implemented. The portable instrument calibration and control program was adequately implemented. The instrument calibration and control program self assessment was thorough and corrective actions were being developed and implemented for the identified deficiencies.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room (PDR).
