Gentlemen:

Subject: Combined Inspection Report No. 50-317/88-20, 50-318/88-20

An unannounced reactive inspection was conducted at Calvert Cliffs on August 17-19, 1988, to review events associated with a higher than anticipated worker exposure. The exposure occurred during routine maintenance activities in the Unit 1 Auxiliary Building 27 foot elevation valve alley on June 1988. No regulatory exposure limits were exceeded during this event.

Within the scope of this review, one apparent violation was identified. Your staff did identify this apparent violation, thereby partially fulfilling criteria for the NRC exercise of enforcement discretion discussed in 10 CFR 2, Appendix C. The above review determined, however, that your corrective actions to prevent recurrence were not taken within a reasonable time. Details are provided in Enclosure Appendix A. You are required to respond to this violation by following the instructions in Appendix A.

Your cooperation with us is appreciated.

Sincerely,

Original Signed By:
Ronald R. Bellamy
