

SEP 06 1988

Docket No. 50-461

Illinois Power Company  
ATTN: Mr. W. C. Gerstner  
Executive Vice President  
500 South 27th Street  
Decatur, IL 62525

Gentlemen:

Thank you for your letter dated August 15, 1988, in response to our July 1, 1988 letter which concerned allegations pertaining to radiation protection activities at the Clinton Nuclear Power Station authorized by NRC Operating License No. NPF-62.

In our letter, we requested that you review the allegations, initiate an appropriate investigation, and take corrective actions as deemed necessary (Allegation No. RIII-88-A-0050). We have no questions concerning your responses to allegations No. 2 and No. 3. Questions concerning allegations No. 1 and No. 4 were discussed with your licensing staff on August 26 and 30, 1988. Based on those discussions, it is our understanding that you will revise your RWP procedure (1905.10) by September 30, 1988, to outline the administrative functions required to be completed when changing RWP protective requirements, and that your personal decontamination procedures presently include provisions for decontaminating localized high level skin contamination. Based on these additional responses we have no further questions regarding the allegations at this time. Completion of your corrective actions for these allegations will be tracked under Open Item 461/88022-01.

We will examine your corrective actions and documentation supporting your responses during a future inspection. This allegation is considered closed.

Your cooperation with us is appreciated.

Sincerely,

Charles E. Norelius, Director  
Division of Radiation Safety  
and Safeguards
