May 13, 1988

Document Control Desk  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Gentlemen:

Subject: WNP-1 and WNP-3 RESPONSE  
GENERIC LETTER 88-05  
BORIC ACID CORROSION OF CARBON  
STEEL REACTOR PRESSURE BOUNDARY  
COMPONENTS IN PWR PLANTS

The Washington Public Power Supply System has received and reviewed the subject Generic Letter. Generic Letter 88-05 requested that all PWR licensees or CP holders provide assurance that a program has been implemented to address the corrosive effects of reactor coolant system leakage at less than Technical Specification limits.

Because of the long-term construction delay status of WNP-1 (B&W NSSS) and WNP-3 (CE NSSS), no action in response to this request will be taken until after restart of construction.

This response is being provided in accordance with 10CFR 50.54(f) as requested. Should you have any questions, please contact me at (509) 372-5238.

Very truly yours,

  
G. C. Sorensen, Manager  
Regulatory Programs
