Re: Radiological Surveys of Shieldalloy's Cambridge, Ohio
and Newfield, New Jersey Sites

Dear Mr. Rouse:

Shieldalloy Metallurgical Corporation has provided us with your letter of July 27, 1988 enclosing the Oak Ridge Associated Universities (ORAU) survey report of Shieldalloy's Cambridge facility along with the results of your staff review. ERT has been commissioned to plan a comprehensive radiological survey of the site as required by the enclosure of your letter.

Shieldalloy has also forwarded to ERT a copy of the survey report of Shieldalloy's Newfield facility prepared by ORAU and sent by Mr. John Kinneman of Region I on August 9, 1988. ERT has been asked to prepare a plan in order to clean up the Newfield site where radiologically necessary. As part of this plan, we are preparing an outline for a radiological survey to be conducted at the facility after completion of the cleanup activities in order to monitor the effectiveness of the cleanup operation.

September 8, 1988

It is desirable that the two surveys for Newfield and Cambridge match the techniques and principles used by your consultant ORAU. We therefore propose to visit with Mr. J. D. Berger of ORAU on September 19, 1988 in order to obtain his informal technical input to our survey outlines. We would appreciate your indicating your agreement to this visit by return telecopy. Our telecopy number is 508-369-6721.

Sincerely yours,

Dr. Raymond E. Holmes
Vice President
Chief Engineer
