PLANT VOGTLE - UNIT 2  
NRC DOCKET NUMBER 50-425  
CONSTRUCTION PERMIT NUMBER CPPR-109  
SER OPEN ITEM 1: EQUIPMENT QUALIFICATION

Gentlemen:

As required by 10CFR50.4 and the Standard Review Plan (Section 3.10), 13 copies of the Vogle Unit 2 Seismic Qualification Report (SQR) are enclosed for your review. The SQR provides a Master List and Qualification Summary for each piece of equipment which is important to safety.

The Master List indicates that Vogle Unit 2 is approximately 85% complete with installation and operability of the equipment. In comparison to Unit 1, some differences in the SQR occur due to the addition of the AMSAC qualification summary and removal of non-safety related (Seismic Category I) equipment. Otherwise, the Unit 2 Seismic Equipment Qualification Program is basically the same as the Unit 1 program which was audited by the NRC in June, 1986.

If any additional information is required, please do not hesitate to contact me.

Sincerely,

J. A. Bailey  
Project Licensing Manager
