Ladies/Gentlemen:

DOCKETS 50-266 AND 50-301
LICENSEE EVENT REPORT 1998-003-01
CONTAINMENT ACCIDENT FAN MOTOR COOLER HEAT EXCHANGER
FLOW RATES FOUND TO BE OUTSIDE THE DESIGN BASIS OF THE PLANT
POINT BEACH NUCLEAR PLANT, UNITS 1 AND 2

Enclosed is Supplemental Licensee Event Report 1998-003-01 for Point Beach Nuclear Plant, Unit 1 and Unit 2. This report is provided in accordance with 10 CFR 50.73(a)(2)(ii)(B), "in a condition outside the design basis of the plant." This report describes the discovery that flow meters used to set service water flow through the accident fan cooler motor heat exchangers resulted in potentially less flow than that assumed in the analysis for the operability of the motors during an accident. This supplement to the original report is provided to revise our corrective action commitment concerning replacement of the service water piping to the Unit 2 fan cooler motor heat exchangers. All changes or additions to the original report have been identified with margin bars.

No new commitments are established within this supplemental report.

Please contact us if you require additional information.

Sincerely,

V. A. Kaminski
Manager,
Regulatory Services & Licensing
