Subject: Comments on Proposed Rule regarding the presence of NRC inspectors
at Nuclear Facilities, Federal Register, 53 FR 8924.

Gentlemen:

Toledo Edison (TED) submits the following comments concerning the Commission's
proposed rule on unannounced NRC inspectors, published in the Federal Register
dated March 18, 1988.

On April 18, 1988, the firm Shaw, Pittman, Potts & Trowbridge submitted
comments on behalf of several utilities, including Toledo Edison. Although,
TED agrees that NRC inspectors should have unfettered access to any facilities
for which they are properly authorized, TED opposes the proposed rule as
written. The adoption of the rule as it is written would hinder the
relationship the industry has worked hard to achieve with the NRC. Therefore,
TED endorses the comments made by Shaw, Pittman, Potts & Trowbridge.

Very truly yours,

GH:tlt
