SHIELDS L. DALTROFF
VICE PRESIDENT
ELECTRIC PRODUCTION

March 3, 1986

Docket No. 50-352
License No. NPF-39

Mr. Robert Bernero, Director
Division of Boiling Water Reactor Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Bernero:

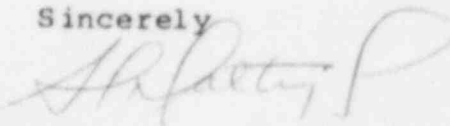

The following information is provided in response to a request from Mr. R. E. Martin of your staff for additional information relating to Philadelphia Electric's request for a temporary one-time exemption of the schedular requirements of Appendix J to 10 CFR Part 50 dated December 18, 1985 for Limerick Generating Station Unit No. 1. Specifically, the Licensee was requested to address the effects that the valve closure failure and leak rate information which was reported in voluntary Licensee Event Report 352-85-102 Rev. 0, dated January 21, 1986, has upon the conclusion and statements contained in the application and subsequent supporting information.

The information presented in the Licensee Event Report was evaluated at the time of the occurrence and again as a result of the current request and was determined to be an isolated failure, and as such, having no effect upon the conclusions and basis for the current amendment request.

The relief which is sought by the subject request for amendment and temporary exemption to 10 CFR 50 Appendix J poses no significant hazards considerations nor does it undermine the purpose of the regulation.

Sincerely

8603100124 860303
