Dear Mr. Kingsley:

SUBJECT: GRAND GULF NUCLEAR STATION (GGNS), UNIT 1 - REMOVAL OF ORGANIZATION CHARTS FROM TECHNICAL SPECIFICATIONS (TAC NO. 67975)

By letter dated May 2, 1988, System Energy Resources, Inc. (the licensee) requested removal of organization charts from the GGNS Unit 1 Technical Specifications. Guidance for this change to Technical Specifications was provided in Generic Letter 88-06.

The NRC staff is reviewing your request and finds that additional information is needed to complete its review. Technical Specification Figure 6.2.2-1, "Unit Organization," specifies that the four top management positions "must have been a SRO or have been certified on a plant of this type." The intent of Generic Letter 88-06 was that qualification requirements such as this identified on the unit organization chart should be retained in the unit Technical Specifications. For GGNS Unit 1, it is the staff's position that the Manager, Plant Operations, should retain this qualification requirement in the TS and that deletion of this requirement from the TS for the other three managers should be justified and considered in the analysis of no significant hazards considerations. Provide a revision to your application to address the staff's position.

In order to complete our review as scheduled, you are requested to provide the above information by May 25, 1988. This request was discussed with Mr. Matt Crawford on May 11, 1988.

The reporting and/or recordkeeping requirements of this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P. L. 96-511.

Sincerely,

131
