Washington, DC 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362  
30-Day Report  
Licensee Event Report No. 1998-019  
San Onofre Nuclear Generating Station, Units 2 and 3

This submittal provides the required 30-day written Licensee Event Report (LER) for an event involving oxygen monitor setpoints exceeding the Technical Specification requirements. Because this occurrence was applicable to both operating units, a single report for Unit 2 is being submitted in accordance with NUREG-1022, Rev. 1. Neither the health nor the safety of plant personnel or the public was affected by this occurrence or condition.

Any actions listed are intended to ensure continued compliance with existing commitments as discussed in applicable licensing documents; this LER contains no new commitments. If you require any additional information, please so advise.

Sincerely,

1/1

LER No. 1998-019
