

SEP 16 1988

In Reply Refer To:
Docket: 50-285/88-26

Omaha Public Power District
ATTN: Kenneth J. Morris, Division Manager
Nuclear Operations
1623 Harney Street
Omaha, Nebraska 68102

Gentlemen:

This refers to the inspection conducted by Mr. R. C. Stewart of this office during the period July 25-29 and August 15-19, 1988, of activities authorized by NRC Operating License DRP-40 for Fort Calhoun Station, and to the discussion of our findings with you and other members of your staff at the conclusion of the inspection.

The area examined during the inspection was the Inservice Testing (IST) Program for pumps and valves. Within this area, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the NRC inspector. The inspection findings are documented in the enclosed inspection report.

During this inspection, it was found that certain of your activities were in violation of NRC requirements. Since corrective action was initiated, completed, and verified by the NRC inspector prior to the completion of this inspection, no written response is necessary.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

L. J. Callan, Director
Division of Reactor Projects
