Gentlemen:

This refers to the inspection conducted by Messrs. R. A. Caldwell and A. B. Earnest of this office during the period January 27-31, 1986, of activities authorized by NRC Operating License NPF-38 for Waterford 3, and to the discussion of our findings with Mr. Ross Barkhurst, and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included locks, keys, and combinations, physical barriers-protected area/vital area, lighting, assessment aids, access control-personnel, access control-packages, access control-vehicles, detection aids-protected area/vital area and safeguards contingency plan. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. These findings are documented in the enclosed inspection report.

During this inspection, it was found that certain of your activities appeared to be in violation of NRC requirements. Paragraphs 2, 3, 4, 5, and 9 of the enclosed inspection report provide details of the apparent violations. As discussed in the telephone conversation of February 28, 1986 with you, we have scheduled an enforcement conference in our office on March 5, 1986, to discuss these apparent violations, the reasons for occurrence, and your corrective actions. We will also discuss any enforcement options, if appropriate.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR Part 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the material, with the exception of the report cover page which is an inspection summary, will not be placed in the Public Document Room.

The enclosed report is not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
