NOTICE

Availability of Reference Materials Cited in NRC Publications

Most documents cited in NRC publications will be available from one of the following sources:

1. The NRC Public Document Room, 1717 H Street, N.W.
Washington, DC 20555
2. The Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082,
Washington, DC 20013-7082
3. The National Technical Information Service, Springfield, VA 22161

Although the listing that follows represents the majority of documents cited in NRC publications, it is not intended to be exhaustive.

Referenced documents available for inspection and copying for a fee from the NRC Public Document Room include NRC correspondence and internal NRC memoranda; NRC Office of Inspection and Enforcement bulletins, circulars, information notices, inspection and investigation notices; Licensee Event Reports; vendor reports and correspondence; Commission papers; and applicant and licensee documents and correspondence.

The following documents in the NUREG series are available for purchase from the GPO Sales Program: formal NRC staff and contractor reports, NRC-sponsored conference proceedings, and NRC booklets and brochures. Also available are Regulatory Guides, NRC regulations in the *Code of Federal Regulations*, and *Nuclear Regulatory Commission Issuances*.

Documents available from the National Technical Information Service include NUREG series reports and technical reports prepared by other federal agencies and reports prepared by the Atomic Energy Commission, forerunner agency to the Nuclear Regulatory Commission.

Documents available from public and special technical libraries include all open literature items, such as books, journal and periodical articles, and transactions. *Federal Register* notices, federal and state legislation, and congressional reports can usually be obtained from these libraries.

Documents such as theses, dissertations, foreign reports and translations, and non-NRC conference proceedings are available for purchase from the organization sponsoring the publication cited.

Single copies of NRC draft reports are available free, to the extent of supply, upon written request to the Division of Information Support Services, Distribution Section, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Copies of industry codes and standards used in a substantive manner in the NRC regulatory process are maintained at the NRC Library, 7920 Norfolk Avenue, Bethesda, Maryland, and are available there for reference use by the public. Codes and standards are usually copyrighted and may be purchased from the originating organization or, if they are American National Standards, from the American National Standards Institute, 1430 Broadway, New York, NY 10018.

Historical Data Summary of the Systematic Assessment of Licensee Performance

ABSTRACT

The Historical Data Summary of the Systematic Assessment of Licensee Performance (SALP) is produced periodically by the U.S. Nuclear Regulatory Commission. This summary provides the results of the assessment for each facility by NRC region and is further divided into the following three sections: Section 1 presents the most recent SALP report ratings for facilities under construction and in operation. Section 2 presents a chronological listing of all SALP report ratings for each operating facility. Section 3 presents a chronological listing of all SALP report ratings for each facility under construction. For historical purposes, past construction SALP ratings for facilities that recently have been licensed also are listed in Section 3.

INTRODUCTION

The Historical Data Summary of the Systematic Assessment of Licensee Performance (SALP) is produced periodically by the U.S. Nuclear Regulatory Commission. This summary provides the results of the assessment for each facility by NRC region and is further divided into the following three sections: Section 1 presents the most recent SALP report ratings for facilities under construction and in operation. Section 2 presents a chronological listing of all SALP report ratings for each operating facility. Section 3 presents a chronological listing of all SALP report ratings for each facility under construction. For historical purposes, past construction SALP ratings for facilities that recently have been licensed also are listed in Section 3.

The SALP program is an integrated NRC staff effort to consolidate available observations and data and to evaluate licensee performance based on this information. It assesses licensee performance in selected functional areas. For facilities in operation these areas generally include: plant operations (OPS), radiological controls (RADCON), maintenance (MAINT), surveillance (SURV), emergency preparedness (EP), fire protection (FP), security (SEC), outages (OUTG), quality programs and administrative controls affecting quality (QP), licensing activities (LIC), and training and qualification effectiveness (TRG).

The functional areas for facilities under construction are soils and foundations (SF); containment, safety-related structures, and major steel supports (CONT); piping systems and supports (PIPE); safety-related components (SRC); auxiliary systems (AUX); electrical equipment and cables (ELEC); instrumentation (INST); design-engineering (DSN); quality assurance and administrative controls affecting quality (QA); and licensing activities (LIC).

Based on a review of the consolidated information, each functional area evaluated is placed into one of three performance categories. A Category 1 rating designates a high level of performance where reduced NRC attention may be appropriate. A Category 2 rating designates a satisfactory level of performance where NRC attention should be maintained at normal levels. A Category 3 rating designates a minimally acceptable level of performance where weaknesses are evident and both NRC and licensee attention should be increased. An "N" indicates that no rating was given for that category.

13. ABSTRACT (200 words or less) The Historical Data Summary of the Systematic Assessment of Licensee Performance (SALP) is produced periodically by the U.S. Nuclear Regulatory Commission. This summary provides the results of the assessment for each facility by NRC Region and is further divided into the following three sections: Section 1 presents the most recent SALP report ratings for facilities under construction and in operation. Section 2 presents a chronological listing of all SALP report ratings for each operating facility. Section 3 presents a chronological listing of all SALP report ratings for each facility under construction. For historical purposes, past construction SALP ratings for facilities that recently have been licensed also are listed in Section 3.
