

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

MAY 16 1988

MEMORANDUM FOR: John A. Skoczlas, Chief  
Document Control Branch  
Division of Information Support Services  
Office of Administration and resources Management

Inez K. Bailey, Chief  
Records Services Branch  
Division of Information Support Services  
Office of Administration and Resources Management

FROM: LeMoine J. Cunningham, Chief  
Radiation Protection Branch  
Division of Radiation Protection  
and Emergency Preparedness  
Office of Nuclear Reactor Regulation

SUBJECT: ENTRY OF SOURCE DOCUMENTS ON HOPE CREEK GENERATING STATION  
INTO DCS MICROFICHE FILES AND ARCHIVING IN NRR DOCKET FILES

REFERENCE: 1. August 30, 1976 letter from R. L. Mittl to Director of  
NRR, USNRC, "Response to Requirements of Appendix I to  
10 CFR 50" with Enclosures 1 and 2.

The enclosed source documents cited above contain basic reference information essential to the long term licensing responsibilities of PRPB for Hope Creek. This information is archival in a manner similar to the FSAR and ER of the licensee. Therefore, we request that these documents be entered into the DCS system on microfiche so that they can be cataloged and available to all DCS users.

These reports should be coded as PDR available in the DCS but no further distribution need be made beyond archiving these original hard copies in Central Files. Because of legibility problems with the microfiche it is essential that one "hard copy" of these documents be continually available on the shelves of the Docket Files for our use in licensing action reviews.

LeMoine J. Cunningham, Chief  
Radiation Protection Branch  
Division of Radiation Protection  
and Emergency Preparedness  
Office of Nuclear Reactor Regulation

Enclosure:  
As Stated
