South Texas Project Electric Generating Station
Unit 1
Proposed Revision to Technical Specifications and
Final Safety Analysis Report for Excessive Cooldown Protection

By letter dated May 18, 1988, Houston Lighting & Power Company (HL&P) requested a change to the South Texas Project Electric Generating Station (STPEGS) Unit 1 Technical Specifications. HL&P has identified an error in the marked up Technical Specification pages transmitted with that letter.

Technical Specification table 3.3-4 item 4.f and table 4.3-2 item 4.f should also be deleted to be consistent with the proposed revision to Table 3.3-3. A revised mark up of the two pages in question is attached. These corrections should be added to the proposed Technical Specification change transmitted by our May 18, 1988 letter.

If you have any questions or need further information, please contact M. A. McBurnett at (512)972-8530.
