Dear Stewart, Bernie, and Don:

I am writing on behalf of Suffolk County, the State of New York and the Town of Southampton, to follow up on pre-exercise discussions concerning exercise-related materials which you indicated would be made available to the Governments after the exercise occurred.

First, on February 12, 1986, FEMA promised that after the exercise, FEMA would provide us with the complete exercise scenario, as well as documents concerning how the scenario was "negotiated." The details of the scenario, including a complete set of all the FEMA "free play" and "simulator" messages, are essential to our understanding of what happened (or was supposed to have happened) during the exercise. I request that the scenario, the exercise messages, and the related documents concerning development of the scenario be provided to us.

Second, since the Governments' exercise monitors were barred from the FEMA Control Cell (the headquarters for the "simulators" of governmental officials) and were not allowed to hear or observe much of the "simulators'" activities or interactions with LILCO employees during the exercise at other locations,^{1/} we have

^{1/} Larry Lanpher at the EOF was able to observe some

practically no knowledge of those activities or interactions. We understand, however, that something called "simulators' logs" were generated during the exercise. We hereby request that copies of those logs be provided to us.

Third, in our pre-exercise conversations concerning the limitations imposed on the Governments' ability to monitor the exercise, we were told about "logs" and other written records which would be kept by the LILCO players during the exercise. We were told that these materials would record the activities, events, and interactions which we were not able to observe ourselves during the exercise. We request copies of those LILCO-kept logs and similar written records generated during the exercise.

After we have had a chance to review these materials and FEMA's report on the exercise, we may have additional requests which we will pursue informally or, if necessary, by more formal means. Please call me, Larry Lanpher or Mike Miller if you have any questions.

Sincerely,

Karla J. Letsche

simulator/LILCO interactions but could hear very little and was unable to observe on many occasions because activities took place far from his assigned location. Also, at LILCO's February 13 press conferences, LILCO spokespersons indicated that there were many telephone conversations between LILCO and the simulators.
