Dear Mr. White:

SUBJECT: ADDITION OF FIVE MOTOR-OPERATED VALVES TO REPLACE CHECK VALVES
(TAC R00364 AND R00365) (TS 88-01) - SEQUOYAH NUCLEAR PLANT, UNITS 1
AND 2

The Commission has issued the enclosed Amendment No. 82 to Facility
Operating License No. DPR-77 and Amendment No. 73 to Facility Operating
License No. DPR-79 for the Sequoyah Nuclear Plant, Units 1 and 2, respectively.
These amendments are in response to your application dated June 13, 1988.

This amendment revises Table 3.6-2, Containment Isolation Valves, of the
Sequoyah Units 1 and 2 Technical Specifications (TS). The revisions are to
add five motor-operated valves (MOV) to the table. These MOVs are replacing
check valves as containment isolation valves. The amendment also adds a note
to Table 3.3-5, "Engineered Safety Features Response Times," to reflect that
the response times of these MOVs, when they are actuated by a Phase B
containment isolation signal, are slightly longer than other containment
isolation valves.

A copy of the Safety Evaluation is also enclosed. Notice of Issuance will be
included in the Commission's Bi-Weekly Federal Register Notice.

Sincerely,

Original signed by
Suzanne Black, Assistant Director
for Projects
TVA Projects Division
Office of Special Projects
