MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

Supplement No. 2 to License Amendment Request Dated August 15, 1996
Revision of Statement on "Normal" Shift Length and Other Misc. Changes

This letter provides Supplement 2 to the Northern States Power Company (NSP) license amendment request dated August 15, 1996 and supplemented March 19, 1998 which proposed changes to the Technical Specifications (TS), Appendix A of the Operating License for the Monticello Nuclear Generating Plant. This information is submitted in accordance with the provisions of 10 CFR Part 50, Section 50.90.

In the interim since submittal of Supplement 1, NSP has identified a number of additional typographical errors and one title change on pages associated with this amendment request. Additionally, the new NSP word processor used for Monticello TS prints pages aesthetically different with no change of content. The specific changes are discussed further in Exhibit A.

With this supplement, NSP is sending replacement Exhibits B and C which contain TS pages which supercede the respective Exhibits B and C of our original and Supplement 1 submittals in their entirety.

As the changes described in this supplement are editorial in nature, this supplement is within the scope of the original license amendment request and the Safety Evaluation, Determination of No Significant Hazards Consideration, and Environmental Assessment are unchanged and remain applicable.
