Evaluation of Proposed Changes

MONTICELLO NUCLEAR GENERATING PLANT

Supplement 2 to License Amendment Request Dated
August 15, 1996

Description of Proposed Changes and Reasons for Changes

Exhibit A of NSP's August 15, 1996 submittal and the associated Supplement 1 dated March 19, 1998 proposed numerous changes and stated the rationale for the changes. In the intervening time additional changes have been identified as explained in the table below. Additionally, NSP is utilizing a new word processor to print Exhibit C pages. Changes associated with this new word processor include a different font, and differences in word wrapping. Finally, because of the time that has elapsed since filing the original request, other submittals have impacted on this amendment request as discussed in the next paragraph. This Supplement 2 augments the original August 15, 1996 submittal and the March 19, 1998 Supplement 1.

Incorporation of Prior Amendments

4/30/98 Bases Change (Amendment No. 100a)

As part of Monticello's program of changing to a new word processor, all Bases pages were reissued effective 4/30/98 under NSP's TS Bases Control Program. Reissued pages were sent to the NRC on 5/12/98 with the designation of Amendment No. 100a. All Exhibit B Bases pages for this Supplement 2, consist of Amendment 100a pages with changes from the original submittal and supplement 1 transposed onto the new pages.

Since Amendment 100a corrected the page 198y error identified in the original 8/15/96 submittal, this Supplement 2 withdraws any further changes to page 198y. Therefore, page 198y is no longer included with this Amendment Request.

July 5, 1995 Amendment Request

In Exhibits B and C, pages 61 and 62 incorporate changes as proposed in license amendment request dated July 5, 1995 titled "Surveillance Test Interval/Allowed Outage Time Extension Program - Part 2." Discussions with the NRC staff indicate pages 61 and 62 of the July 5, 1995 amendment request will be issued as proposed. Therefore, Exhibits B and C of this amendment request reflect the proposed changes of the July 5, 1995 amendment request.

Impact of Changes on Exhibits B and C

Exhibit B - Technical Specification Pages Marked Up with Proposed Changes

All Exhibit B pages are included with this Supplement 2 so as to supercede the Exhibit B submitted with the original request (8/15/96) and Supplement 1 (3/19/98) in their entirety. Pages

¹ Title change based on June 1998 NSP organization chart and Revision 16 of USAR Figure 13.2-3.

are identical to the earlier submittals with the exceptions of changes indicated in the table above and the Amendment 100a Bases pages discussed above. To assist the NRC in the review process, applicable submittal dates (8-15-96, 3-19-98, or Supplement 2) have been entered at the upper right hand corner of each page. "Supplement 2" on Bases pages indicates that earlier changes have been transferred to current pages (Amendment 100a). No additional changes have been made to Bases pages.

Exhibit C - Revised Technical Specification Pages

All Exhibit C pages have been reprinted and are included with this Supplement 2 so as to supercede the Exhibit C submitted with the original request (8/15/96) and Supplement 1 (3/19/98) in their entirety.

Safety Evaluation

The changes described in this supplement are editorial in nature. The title change reflects current NSP organization titles and does not reduce the level of plant responsibility. This supplement is therefore within the scope of the original license amendment request and the Safety Evaluation is unchanged and remains applicable.

No Significant Hazards Consideration

As the changes described in this supplement are editorial in nature, this supplement is within the scope of the original license amendment request and the No Significant Hazards Consideration is unchanged and remains applicable.

Environmental Assessment

As the changes described in this supplement are editorial in nature, this supplement is within the scope of the original license amendment request and the Environmental Assessment is unchanged and remains applicable.
