Inspection Summary: Routine Unannounced, Physical Security Inspection
on April 7, 1988 (Report No. 50-247/88-12)

Areas Inspected: Licensee's program for the protection of Safeguards Information in accordance with 10 CFR 73.21, including the use of required storage repositories and the adequacy of handling procedures.

Results: The licensee was found to be in compliance with NRC requirements in the areas inspected.

Details

1. Persons Contacted

Mr. T. Allaway, Director - Security Services

2. Physical Protection of Safeguards Information

The inspector reviewed the licensee procedures and records, interviewed personnel, and visually examined Safeguards Information (SGI) repositories to determine whether the licensee's program for the protection of Safeguards Information meets the general performance requirements of 10 CFR 73.21. The inspector's review encompassed the types of information being protected, physical protection (in-use and in-storage), markings, access, reproduction, destruction, and external transmissions, including automatic data processing systems.

The licensee was found to be in compliance with NRC requirements in the areas inspected.

3. Exit Interview

The inspector reviewed the findings with Mr. T. Allaway at the conclusion of the inspection on April 7, 1988.

No written material was provided to the licensee during the inspection.
