By letter dated December 23, 1986, TVA committed to submit the unit 2 technical specification change within 60 days of completion of the mode 3 testing. Jack Donohew was notified by telephone that the AFW mode 3 testing for unit 2 was considered field complete on March 23, 1988. Therefore, the proposed change was due to NRC May 22, 1988. Mr. Donohew was notified by telephone on May 19, 1988, that because of a temporary redirection of resources, the May 22 date would not be met. During the telephone call, Mr. Donohew was informed that the technical specification change would be submitted on or before May 27, 1988.

Please direct questions you may have concerning this issue to Russell R. Thompson at (615) 870-7470.
