Subject: **Vermont Yankee Nuclear Power Station**
License No. DPR-28 (Docket No. 50-271)
Vermont Yankee Operational Quality Assurance Manual (VOQAM) Revision 1

Enclosed for your information is Revision 1 of the Vermont Operational Quality Assurance Program (VOQAM). This revision incorporates clarifications and organizational updates to the Quality Assurance Program for Vermont Yankee Nuclear Power Corporation (VYNPC).

VOQAM Revision 0 (formally YOQAP-1-A, Revision 27) was adopted by VYNPC as described in Reference (a), and became effective on May 1, 1998. Revision 28 of YOQAP-1-A was originally submitted to the NRC for information and review on June 23, 1997, and withdrawn via Reference (a). The organizational changes defined in Revision 28 were implemented at the time of the submittal following completion of a 10CFR50.54(a) evaluation that revealed no reduction in commitments as a result of the changes. Revision 1 of VOQAM includes those changes.

An evaluation has been performed on the changes in VOQAM Revision 1 to determine if any requirements in the QA Program previously approved by the NRC were deleted or made less effective, thereby constituting a reduction in commitments. This evaluation also assessed the revised program for compliance with the criteria of 10CFR50, Appendix B.

The major change in this revision is the removal of all references to the Yankee Atomic Electric Company (YAEC) and its Yankee Nuclear Services Division (YNSD) as discussed in reference (a). All other changes reflect organizational adjustments as a result of realignment of responsibilities, title changes, or creation of new positions. These clarifications and organizational changes do not constitute a reduction in commitments, and the revised Program continues to satisfy 10CFR50 Appendix B criteria. (See Attachment A for a description of all changes.)
