Dear Secretary
OFFICE OF PUBLIC AFFAIRS
DOCKETING & SERVICE
BRANCH

Seabrook nuclear plant has been held up by uninformed and emotional people for well over ten years. In a few short years we will be dangerously deficient in electric power if the plant does not come on line as soon as possible.

It has been easy to delay the start of the plant by shouting emotional nonsense of the dangers we all face. Kenoble was the final blow and even the governor of Massachusetts, decided to get in the party, using this as an excuse to deny the opening.

at this rate the plant will never open, and the placing of emergency sirens is just another delaying tactic. I hope in spite of all the letters you will get from the moral minority, you will allow ^{low} power licensing for the plant without emergency sirens.

Sincerely
Joseph D. Bowen
