Dear Mr. White:

SUBJECT: ADDITION OF RCS PRESSURE ISOLATION VALVES - SEQUOYAH NUCLEAR PLANT, UNITS 1 AND 2 (TAC 61779, 61780, R00153, R00154) (TS 87-35)

The Commission has issued the enclosed Amendment No. 83 to Facility Operating License No. DPR-77 and Amendment No. 74 to Facility Operating License No. DPR-79 for the Sequoyah Nuclear Plant, Units 1 and 2, respectively. These amendments are in response to your application dated June 10, 1987.

These amendments revise Table 3.4-1, Reactor Coolant System Pressure Isolation Valves, of the Sequoyah, Units 1 and 2 Technical Specifications (TS). The changes are to add the two upper head injection charging header valves to Table 3.4-1. These valves are different from most of the valves in Table 3.4-1 in that the staff has accepted that these two valves do not have to be leak tested following manual or automatic actuation or flow through the valve.

In your application, you also withdrew TS change 68 which was submitted by letter dated May 10, 1986.

A copy of the Safety Evaluation is also enclosed. Notice of Issuance will be included in the Commission's Bi-Weekly Federal Register Notice.

Sincerely,

Original signed by
Suzanne Black, Assistant Director
for Projects
