

Docket No.: 50-482

Mr. Glen L. Koester
Vice President - Nuclear
Kansas Gas and Electric Company
Post Office Box 208
Wichita, Kansas 67201

MAR 17 1986

Dear Mr. Koester:

Subject: License Condition 2.c.(4), Wolf Creek Generating Station

License Condition 2.c.(4) to Facility Operating License NPF-42 for Wolf Creek requires the electrical equipment within the scope of 10 CFR 50.49 be environmentally qualified in accordance with the schedule in that rule.

Your environmental qualification programs have previously been reviewed and found acceptable. The results of the staff review are detailed in section 3.11 of the Wolf Creek SER (NUREG-0881).

At the time of the staff review not all equipment within the environmental qualification program was considered fully qualified. Acceptable justification for interim operation was provided for those equipment items not fully qualified. The above condition was included in the Wolf Creek operating license to assure timely completion of qualification within regulatory requirements.

By letter dated November 29, 1985 from N. A. Petrick (SNUPPS) to H. R. Denton (NRC), you stated that all electrical equipment has been environmentally qualified to the provisions of 10 CFR 50.49. A final report detailing your position was submitted on January 17, 1986.

Since the staff has already reviewed and approved the Wolf Creek qualification programs, the notification provided in the above letter with subsequent submission of the final report, is adequate to satisfy the condition imposed on the operating license.

Based on the above, the staff finds that License Condition 2.c.(4) has been fulfilled.

Sincerely,

151

B. J. Youngblood, Director
PWR Project Directorate #4
Division of PWR Licensing-A
