Dear Sir:

In Reference 1, the NRC requested information on switch settings for certain safety-related motor operated valves. The Authority provided the requested information for the FitzPatrick plant in References 2 and 3. The NRC subsequently issued Supplement 1 to the Bulletin which requested similar information for an additional group of valves.

The Boiling Water Reactor Owners Group (BWROG) B85-03 subcommittee agreed to prepare an evaluation for additional valves in Reference 4. The subcommittee, in which the Authority is actively participating, will complete the evaluation by July 15, 1988. The Authority requires an additional five weeks to prepare a plant specific response incorporating the results of the BWROG evaluation. Therefore, the Authority will provide a response to IEB 85-03 Supplement 1 for the FitzPatrick plant by August 19, 1988.
