To Diane Screnci (Public Affairs officer), Neil A. Sheehan (Public Affairs officer), Larry Duerflein (Projects Branch Chief), Darl Hood (Reactor project Manager) and Barry Norris (Resident Inspector):

Although I enjoy living in Central New York, I have an underlying worry about living so close to nuclear power plants - especially Nine Mile I, which has a poor safety record.

I request that the NRC, not Ni Mo, perform a thorough safety analysis and systems readiness review of Nine Mile I. At least until such report is complete, PLEASE SHUT DOWN NINE MILE I.

I'd appreciate a reply to my request. Thank you.

Sincerely,

*Linda DeStefano*
