October 7, 1998

Attention: Mr. Darl Hood
Re: Nine Mile Point 1 core shroud inspection

Dear Sir:

We are enclosing copies of a petition containing approximately 366 signatures collected over the past two months, concerning the core shroud situation at the Nine Mile Point 1 nuclear power station.

You will notice the major request of the petition is that the NRC require inspection of the NMP1 core shroud after 10,600 hours. We believe that the signatures collected represent a strong public desire for the strongest possible oversight of nuclear reactors by the NRC.

Sincerely

Simon Morrin

Nine Mile Point One Petition

We the undersigned respectfully request that the United States Nuclear Regulatory Commission (NRC) enforce the commitment by Niagara Mohawk to inspect the core shroud at the Nine Mile Point One Nuclear Power Station for crack growth in mid-cycle (October 1998). We also ask that the NRC make public all the water chemistry records at the Nine Mile Point One plant since July 1997, and that a public hearing be held in Oswego County in September 1998 on the mid-cycle inspection and to review the water chemistry records.

Nine Mile Point One Petition

We the undersigned respectfully request that the United States Nuclear Regulatory Commission (NRC) enforce the commitment by Niagara Mohawk to inspect the core shroud at the Nine Mile Point One Nuclear Power Station for crack growth in mid-cycle (October 1998). We also ask that the NRC make public all the water chemistry records at the Nine Mile Point One plant since July 1997, and that a public hearing be held in Oswego County in September 1998 on the mid-cycle inspection and to review the water chemistry records.
