NROTC Unit
Attn: Lt. David Hovda (USN)
Massachusetts Institute of Technology
Building 20E-125
Cambridge, Massachusetts 02139

Dear Lt. Hovda:

This confirms our telephone conversation of September 8, 1988 concerning the use of your facility for temporary storage of a classified document. This letter requests your formal approval for use of that facility.

A study on radiological sabotage considerations in non-power reactors was completed for the Nuclear Regulatory Commission. The report, "Nonpower Reactor Sabotage Study," LA-CP-87-02, January 1987, is classified Confidential National Security Information. We need to have this report reviewed by personnel from the Massachusetts Institute of Technology (MIT). Personnel security clearances are being processed for these personnel. However, since they do not have a cleared facility, we request your approval to transfer the classified document to your facility where it can be stored and reviewed by MIT personnel. We anticipate that you would retain the document for a period of a few weeks in fall 1988. Once the personnel security clearances are approved, we will submit the appropriate visit and access authorization request in advance of the visits.

We would appreciate your consideration and approval of this request. If you have any questions please contact me at 301-492-1121.

Sincerely,

/s/

Alexander Adams, Jr., Project Manager
Standardization and Non-Power
Reactor Project Directorate
