Gentlemen:

SUBJECT: Miscellaneous Amendments/Search Requirements (TAC #65212) for Fort Calhoun Station.

In Reference 4, the Omaha Public Power District responded to the comments provided by Reference 3, and submitted the revised Site Security Plan changes. Changes related to question 8 and 10 were based upon completion of the new Site Security Computer. The Site Security computer implementation has been delayed as discussed in a meeting in Arlington, Texas on September 22, 1988 and presented in Reference 5, is now scheduled for implementation by September 30, 1989. This was discussed with the NRC reviewer Mr. E. McPeak. The changes are provided in the attachment and can be identified by vertical lines in the right hand margin. Other changes provided in Reference 4 were included in Revision 23 to the Site Security Plan and were denoted as being related to the "Miscellaneous Amendments" issue. Question 9 has also been revised and included based on questions from the NRC's reviewer.
