Subject: Catawba Nuclear Station, Units . . .  
Docket Nos. 50-413 and 50-414  
Technical Specification Amendment  
Containment Pressure Control System

Dear Sir:

This letter contains a proposed amendment to the Technical Specifications for Facility Operating License Nos. NPF-35 and NPF-52 for Catawba Units 1 and 2. The request involves adding clarification to certain Technical Specification requirements.

In particular this amendment would clarify requirements for the Containment Pressure Control System by more clearly detailing the design of the System.

The attachment contains the proposed changes and a discussion of the justification and safety analysis. The analysis is included pursuant to 10 CFR 50.91 and it has been concluded that the proposed amendment does not involve significant hazards considerations.

This proposal involves one amendment request to Catawba's Technical Specifications. Accordingly, pursuant to 10 CFR 170.21 a check for \$150.00 is enclosed.

Pursuant to 10 CFR 50.91 (b) (1) the appropriate South Carolina State Official is being provided a copy of this amendment request.

Very truly yours

Hal B. Tucker
