

MAY 24 1988

Docket No. 50-341

The Detroit Edison Company  
ATTN: B. Ralph Sylvia  
Group Vice President  
Nuclear Operations  
6400 North Dixie Highway  
Newport, MI 48166

This refers to the routine safety inspection conducted by Mr. H. A. Walker of this office on April 27-29, 1988, of activities at the Enrico Fermi Nuclear Power Plant authorized by NRC Operating License No. NPF-43 and to the discussion of our findings with Mr. D. R. Cipson and others of your staff at the conclusion of the inspection. The purpose of this inspection was to followup the March 7-25, 1988 inspection (50-341/88007) and to evaluate the material condition of the plant at the conclusion of the 1988 Local Leak Rate Test (LLRT) outage.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosures, and your response to this letter will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

Original Signed by J. J. Harrison

J. J. Harrison, Chief  
Engineering Branch
