

SEP 19 1988

Docket No. 50-302
License No. DPR-72

Florida Power Corporation
Mr. W. S. Wilgus
Vice President Nuclear Operations
ATTN: Manager, Nuclear Licensing
P. O. Box 219
Crystal River, FL 32629

Gentlemen:

SUBJECT: NOTICE OF VIOLATION
(NRC INSPECTION REPORT NO. 50-302/88-24)

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by P. Holmes-Ray on July 16 - August 12, 1988. The inspection included a review of activities authorized for your Crystal River facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities appeared to violate NRC requirements. The violations, references to pertinent requirements, and elements to be included in your response are described in the enclosed Notice of Violation.

Your attention is invited to the unresolved items identified in the inspection report. These issues are potentially significant to the plant design bases in a cumulative manner and warrant your attention. They concern incoming technical vendor information that may not have been appropriately controlled and evaluated in regard to their effect on the functionality of the applicable components and systems (paragraphs 8 and 9). These matters will be pursued during future inspections.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

The responses directed by this letter and the enclosures are not subject to the clearance procedure of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, Pub. L. No. 96-511.
