

Federal Emergency Management Agency

Washington, D.C. 20472

MAR 25 1986

MEMORANDUM FOR: Edward L. Jordan
Director
Division of Emergency Preparedness
and Engineering Response
Office of Inspection and Enforcement
U.S. Nuclear Regulatory Commission

FROM:

Richard W. Krimm
Richard W. Krimm
Assistant Associate Director
Office of Natural and Technological
Hazards Programs

SUBJECT: Post Exercise Assessment of the June 5, 1985, Exercise of the
Offsite Radiological Emergency Preparedness Plans for the Oyster
Creek Nuclear Generating Station

Attached are two copies of the Post Exercise Assessment of the June 5, 1985, joint exercise of the offsite radiological emergency preparedness plans for the Oyster Creek Nuclear Generating Station. This was a joint full-participation exercise for the State of New Jersey and Ocean County. The assessment dated August 22, 1985, was prepared by Region II of the Federal Emergency Management Agency (FEMA).

There were no deficiencies observed at the exercise. There were inadequacies identified requiring corrective actions; however, they did not detract from the overall demonstrated capability to protect the health and safety of the public.

A copy of the State's schedule of corrective actions is also attached. The schedule identifies exercise inadequacies, indicates the State or County response, provides FEMA's evaluation of the response, and notes the status of the remedial action. FEMA Region II is working with the State to assure completion of the necessary corrective actions.

For purposes of completeness, we have also attached copies of exercise reports for the March 1982, May 1983 and May 1984 exercises of the Radiological Emergency Response Plans of the State of New Jersey, Ocean County and Ocean County municipalities.

If you have any questions, please contact Mr. Robert S. Wilkerson, Chief, Technological Hazards Division, at 646-2861.
