Omaha Public Power District
ATTN: R. L. Andrews, Division Manager-
Nuclear Production
1623 Harney Street
Omaha, Nebraska 68102

Gentlemen:

This refers to the inspection conducted by Messrs. P. H. Harrell and T. Reis of this office during the period April 6 - May 13, 1988, of activities authorized by NRC Operating License DPR-40 for the Fort Calhoun Station, and to the discussion of our findings with you and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included followup on the status of instrument air accumulator assemblies and followup on an onsite event. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the NRC inspectors. The inspection findings are documented in the enclosed inspection report.

During this inspection, it was found that certain of your activities appeared to be in violation of NRC requirements. As discussed in the telephone conversation between T. F. Westerman and W. G. Gates of your staff, we have scheduled an enforcement conference in our office at 10 a.m. on June 8, 1988, to discuss your understanding of the apparent violations, the reasons for occurrence, and your corrective actions. We will also discuss the enforcement policy, if appropriate. An agenda for this meeting is enclosed.

Three unresolved items are identified in paragraph 3 and one unresolved item is identified in paragraph 4.

The response directed by this letter and the accompanying Notice is not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
