SUBJECT: NRC INTEGRATED INSPECTION REPORT NOS. 50-321/98-05 AND  
50-366/98-05

Dear Mr. Sumner:

On September 19, 1998, the NRC completed an inspection at your Hatch 1 and 2 reactor facilities. The enclosed report presents the results of that inspection.

During the seven-week period covered by this inspection report, your conduct of activities at the Hatch facility was generally characterized by safety-conscious operation, sound engineering and maintenance practices, and careful radiological work controls.

The enclosed Inspection Report identifies activities that violate NRC requirements that will not be subject to enforcement action because the licensee's efforts in correcting the violations meet the criteria specified in NUREG - 1600, Enforcement Policy.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,  
(Original signed by  
Pierce H. Skinner)
