NPF-7

Gentlemen:

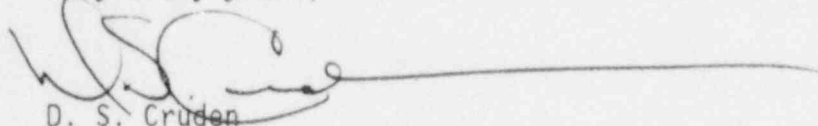

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNITS 1 AND 2
INSPECTION REPORT NOS. 50-338/87-39 AND 50-339/87-39

Our letter dated February 26, 1988 (Serial No. 88-060) provided the response to the Notice of Deviation from Inspection Report Nos. 50-338/87-39 and 50-339/87-39. The response to the Notice of Deviation indicated that a procedure generation and maintenance system for emergency operating procedures would be installed and fully functional, by June 1, 1988, to automatically cross-reference and insert setpoints from the setpoint database into the procedures when printed or updated.

The software for the procedure generation and maintenance system for emergency operating procedures is currently being developed but will not be completed by June 1, 1988. The procedure generation and maintenance system will be installed and fully functional by August 1, 1988.

If you have any questions, please contact us.

Very truly yours,

D. S. Cruden
