MEMORANDUM FOR: Dominic DiIanni, Project Manager
Operating Reactors Branch #3
Division of Licensing

FROM: Gus C. Lainas, Assistant Director
for Operating Reactors
Division of Licensing

SUBJECT: COMMENTS ON SHOLLY REGULATIONS

Your memorandum of May 30, 1984 provided your estimates of the manpower requirements necessary to implement the interim Sholly regulations and a request to eliminate the prenoticing of amendment requests having no significant hazards considerations. OELD has responded by stating that Public Law 97-415 requires this type of amendment request to be prenoticed.

Your memorandum does correctly state that there is an impact on agency resources due to the prenoticing efforts required by public law. However, a large portion of this impact is due to the procedure for implementing the Sholly regulations, which includes a detailed review of the prenotice by OELD. After consultation with management, we believe that it is more beneficial to the agency as a whole to continue the present implementation procedures even with their resources impact.

I appreciate your efforts in providing your estimates and comments. My response is based upon a serious consideration of your concerns. However, you may feel free to press your concerns in this matter further, if you so desire, with senior management.

MEMORANDUM FOR: Harold R. Denton, Director
Office of Nuclear Reactor Regulation

FROM: Darrell G. Eisenhut, Director
Division of Licensing

SUBJECT: "SHOLLY" STATISTICS

Enclosed is the update of the Sholly statistics covering the period May 6, 1983 through September 28, 1984.

One paid public announcement was issued during this reporting period. Georgia Power Company filed an application for amendment dated August 27, 1984 for the Edwin I. Hatch Nuclear Plant, Unit No. 2. The proposed amendment would change the overcurrent trip setpoints for four circuit breakers listed in Technical Specification Table 3.8.2.6-1, "Primary Containment Penetration Conductor Overcurrent Protective Devices." The exigent circumstances result from the licensee's late recognition that the TS change was necessary in order to provide the new overcurrent trip setpoints. While the plant can be started up and operated without this change, extended operation without the change is undesirable because it requires deenergizing the main steamline drain valve motor.

No additional comments nor requests for hearing have been received.

The next monthly FRN is scheduled for publication on October 24, 1984, after which the statistics will be updated.

Backlog: (applications received which have not been noticed, either in monthly FRN or individually through September 28, 1984): NUMBER 283 (Includes items which have been prepared and approved for publication in October monthly, items which are in concurrence chain, and items for which additional information is needed from the licensee.)

FOOTNOTES: See Pages 2 and 3.

FOOTNOTES FOR "SHOLLY" STATISTICS

1/ Comments

- Grand Gulf - 2 comments - one from State, one from a member of the public.
- TMI-1 - 7 comments received as result of initial noticing action, 1 additional comment received as a result of Notice of Additional Opportunity published on August 25, 1983.
- Susquehanna - 1 comment received from a member of the public.
- Oyster Creek - 1 comment received from State.
- WNP-2 - 1 comment received from a member of the public.

2/ Requests for hearing

- TMI-1 - Steam generator repair - 2 requests for hearing received. Prehearing conference held. By a Memorandum and Order dated June 1, 1984, Board dismissed 9 of 11 contentions. Hearing concluded July 18, 1984. Staff's proposed findings submitted August 20, 1984. Board is expected to issue Initial Decision this fall.
- Salem-1 - Integrated leak rate - 1 request for hearing received from State of Delaware. On January 20, 1984, State filed a motion to withdraw which was granted by Board on January 25, 1984.
- Turkey Pt. 3/4 - (a) Proposed operational limits for current and future reloads - 2 requests for hearing (2 units). Prehearing conference held February 28, 1984. Discovery in process. (b) Spent Fuel Storage Expansion - 2 requests for hearing (2 units). (c) Enriched fuel storage - 2 requests for hearing (2 units). Nuclear Responsibility Inc. and Joette Lorian petitioners in all three issues.
- Pilgrim - Single loop operation - 1 request for hearing. Proceeding dismissed January 26, 1984 based on settlement.
- Grand Gulf - Amendment No. 10 redefined HPCS operation and resulted in a calculated increase in peak clad temperature. One hearing request received. Prehearing conference held February 29, 1984. ASLB issued decision on April 23, 1984 admitting two contentions for discovery. On September 24, 1984, ASLB issued Memorandum and Order Terminating Proceeding.
- Trojan - Spent fuel pool expansion - 2 requests for hearing, 1 from State and 1 from Coalition for Safe Power. Both admitted as parties to proceeding. Prehearing conference held. Two contentions accepted. Coalition has withdrawn from proceeding. Hearing scheduled for October 10/11, 1984.
- Zion 1/2 - Containment leak testing - 2 requests for hearing (2 units) from Citizens Against Nuclear Power. Licensee subsequently withdrew application.

3/ Amendments Issued, Item (3)

TMI-1 hot testing, 1 amendment

Salem 1 integrated leak testing, 1 amendment

Turkey Pt. 3/4 operational limits for current/future reloads, 2 amendments

TMI-1 hot functional testing of SG, 1 amendment

Trojan spent fuel pool, 1 amendment

Turkey Pt. 3/4 SFP storage expansion - 2 amendments
