OFFICE OF SECRETARY  
DOCKETING & SERVICE  
BRANCH

May 31st, 1988

Secretary of the Commission  
Att'n Docketing and Service Branch  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Sirs:

I am in favor to license Seabrook Power Station for the following reasons. First, it is the cleanest form of power, there isn't any acid rain from it. This protects our enviorment. This safe form of power does not cause spills on the roads like the accidents that are forcing to evacuate towns and cities when trucks loss their cargoes of gas- acids and oils. Barges also kill sea life eventually killing the fish that is needed for our food. ( Barges spilling oil)

I believe time has come to stop playing with our lifes to further political ambitions. Look at the Atomic plants in France and other countries. They are functioning , and I don't see why this cannot be done in the U.S.A.

Favorable vote for the license will be appreciated by all of us.

Sincerely

*Benjamin Schiffman*  
Benjamin Schiffman.
