

Secretary of the Commission, **DOCKET NUMBER** **PR 50** **634**
U. S. Nuclear Regulatory Comm. **PROPOSED RULE**
Washington, D.C. 20555 **(53 FR 16435)**

Attn: Docketing & Service Branch

Dear Sirs, I am writing in support of the 1988 J-2 P7:17
proposed clarification of emergency planning
requirements for low power reactors. We have
in New England desperately need the production
of Reactor and fuel as but summary
experience proved so positively. You have great
a large percentage of the opponents base their
opposition on Chernobyl. Having seen at first hand
the poor quality of Russian construction, I think
this is a weak argument, one that should in fact
be disregarded. Again, I urge adoption of
your proposed clarification of emergency planning
requirements for low power reactors.

Sincerely yours,
Wm. H. Fitzhugh
