OFFICE OF
DOCKET
BRANCH
Secretary of Commission,
U.S. Nuclear Regulatory Commission,
Washington D.C. 20555.

Dear Mr Secretary

I was overjoyed to learn of your proposals regarding operating & testing Nuclear plants at less than 5% of capacity whereas sirens may not be in place when tests take place.

This indeed is great encouragement for New England & the Seabrook Station where energy is needed so badly & I commend you highly for your actions.

It is sad to realize that all those Nuclear protesters cannot think back to 1978 energy shortage. I hope & pray that commonsense & intelligence will prevail & that we will get Seabrook on line.
