

APPENDIX A

NOTICE OF VIOLATION

Omaha Public Power District
Fort Calhoun Station

Docket: 50-285
Operating License: DPR-40

During an NRC inspection conducted on April 1-30, 1988, a violation of NRC requirements was identified. The violation involved the failure to provide procedures for limiting radioactive materials released to the environment. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1988), the violation is listed below.

Section 5.8.1 of the Technical Specifications states, in part, that written procedures shall be established, implemented, and maintained that meet or exceed the requirements of Appendix A to Regulatory Guide 1.33.

Paragraph 7 of Appendix A to Regulatory Guide 1.33 states, in part, that the control of radioactivity (for limiting materials released to the environment and limiting personnel exposure) shall be covered by written procedures.

Paragraph 2.21.1 of Section VII-2 of the Radiation Protection Manual states, in part, that personnel suspected of skin contamination, due to monitoring instrument alarms, must contact a radiation protection technician.

Contrary to the above, on April 12, 1988, the NRC inspector witnessed five individuals that passed through and alarmed the radiation portal monitor located in the security building but did not contact a radiation protection technician.

This is a Severity Level V violation. (Supplement IV)(285/8813-02)

Pursuant to the provisions of 10 CFR Part 2.201, Omaha Public Power District is hereby required to submit to this office, within 30 days of the date of the letter transmitting this Notice, a written statement or explanation in reply, including for each violation: (1) the reason for the violation if admitted, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Where good cause is shown, consideration will be given to extending the response time.

Dated at Arlington, Texas,
this 9th day of June 1988
