

DOCKET NUMBER PR 50 (53 FR 16435)

Mr. & Mrs. Robert H. Seefeld R.F.D. #1 Box 2520 No. Edgecomb, Maiorrich BRANCH June 1, 1988

Secretary of the Commission Attn: Docketing and Service Branch U.S. Nuclear Regulatory Commission Washington, D.C. 20555

Dear Sir:

We have recently learned that the U.S. Nuclear Commission has proposed a new rule to clarify requirements new nuclear power plants must meet with regard to low-power testing.

It is our understanding that such low-power testing poses no threat to the residents living in the vicinity of such a plant and that the Commission feels that sirens should not be needed.

It is our opinion that we need to get on with the licensing of plants like Seabrook which will serve the needs of this vital, growing economy safely and efficiently.

We have confidence that the Commission has studied the ramifications of low-power testing and that the proposed rule should be applied with no further ado.

Very Sincerely yours,

Robert H. Seefeld
