OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

Gentlemen:

The purpose of this letter is to register my strong support for your new rule regarding low power testing of nuclear power plants. As I understand it, this new rule makes it clear that off-site emergency sirens need not be in place when low power testing is conducted.

I am a resident of Portsmouth NH and a customer of Public Service of New Hampshire. I live only 15 miles from Seabrook but I would like to see that plant come on line as soon as possible - it is long overdue! We urgently need the electric power that it can produce and it is a very safe, well constructed facility.

Very truly yours

Harold C. Passer
