> 2) Detroit Edison to NRC Letter, Sylvia to Davis, NRC-88-0179 dated July 21, 1988

Subject: Informal Fermi 2 Advisory Group

This letter is to inform you that I have established an informal advisory group at Fermi 2 made up of the outside consultant members of our Muclear Safety Review Group (NSRG). Two of the members, Jim Green and Murray Miles were members of the former Independent Overview Committee. The third member of the group is Darrell Eisenhut who replaced Sol Levy on our NSRG. The group is chartered to advise me as to the effectiveness of our ongoing improvement programs and help me identify any other concerns which could affect plant safety.

I plan to meet with the group bi-monthly following the regularly scheduled NSRG meeting. I also plan to have Jack Calhoun meet with this group to provide perspective from his viewpoint as the former Chairman of the Independent Overview Committee.

If you have any questions, please contact me.

Sincerely,

Bhalph Sylin
