Re: Amendment to License No. 34-09739-01
Hillcrest Hospital

Gentlemen:

Please amend the above referenced license to increase the maximum possession limit of Group III of Schedule A, Section 35.100 of 10 CFR, from 3 Curies to 4.5 Curies.

The reasons for this request are as follows:

1. Patient study load and variety of procedures offered has increased since our original license application was filed with your office.
2. We wish to periodically conduct invitro research utilizing technetium-99m eluted from a molybdenum-99/technetium-99m generator. Such a research project will undergo review by the Radiation Safety Committee for approval prior to its onset. The review will be documented in the Committee minutes.

The required \$120.00 amendment fee is enclosed.

If you have any questions regarding this request, please do not hesitate to contact the undersigned.

Sincerely,

HILLCREST HOSPITAL
