Dear Mr. Secretary,

Please let me comment on my feelings in regards to approving your rule on the proposed clarification of emergency planning requirements for low power licenses. We so desperately will require the potential of Seabrook in our continuous need for energy. Where else is our supply to come from? Already we are feeling the crunch and it will be worse in the future. So many public officials have used Seabrook as a "political football" but so far, they have offered no other solutions to our ever growing problem. Please rule for low power testing at Seabrook and allow us an energetic future in New England.

Thank you for listening.

Sincerely,
Janet S. Johnson
