Att. Docketing and
Service Branch '88 JUN-2 P7:13
U.S. Regulatory Commission

OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

Gentlemen:

In commenting on the
new rule "Quote" that off site
emergency sirens need not
be in place when Nuclear Power
Plants are being tested at less
than 5 percent of capacity,
I am fully in favor of such a
plan.

I have written once before
to the N.R.C. in favor of start-
ing up the Seabrook Nuclear
Power plant and have express-
ed myself in regards to giving
the States a voice in Nuclear
Power Plant installations
which I stated that it was a
mistake by the N.R.C. to allow
the states to have this right.
as I consider building, testing
and all else is a Federal resp-
onsibility and the politics

of the states not to be included
in such an important matter.

If Nuclear Power plants are
not wanted in the U.S.A. it is
the voice of all the peoples in
this country not a few thousand
activists that will march and
protest on any thing.

I am at a loss to understand
why it has taken so long to
get this important energy prod-
ucing plant started.

This letter is written only to
get the plant producing and
the N.R.C. to have the courage
to do so.

I have no investment of any
kind in the Sea brook Plant.

Yours truly
R. G. Putnam
