Arkansas Power & Light Company  
ATTN: Mr. Gene Campbell  
Vice President, Nuclear  
Operations  
P.O. Box 551  
Little Rock, Arkansas 72203

Gentlemen:

This refers to the inspection conducted by Mr. N. M. Terc of this office during the period May 9-12, 1988, of activities authorized by NRC Operating Licenses DPR-51 and NPF-6 for Arkansas Nuclear One, Units 1 and 2, and to the discussion of our findings with members of your staff after the inspection.

Areas examined during the inspection included review of the operational status of the emergency preparedness program. In particular, the NRC inspector reviewed your revised Emergency Action Levels (EALs), and the training and proficiency of personnel in using them. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the NRC inspector. The inspection findings are documented in the enclosed inspection report.

Our review of the new EALs and their implementation determined that certain improvements were necessary. During the exit interview, you committed to do the following:

- ° Complete all required follow-up training on EALs by June 30, 1988.
- ° By July 1, 1988, revise EPIP 1903.10, Revision 21, "Emergency Action Level Classification," to include the improvements outlined in Section 3 of the enclosed inspection report.
- ° Complete all required classroom and practical training of essential personnel on revised EALs by August 29, 1988.

We also examined your actions regarding a previously identified inspection finding, as described in paragraph 2 of the enclosed report.

The response directed by this letter and the accompanying Notice is not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
